

Project Initial Details Submission

Requirements

- **Length:** Maximum 2 page
- **Format:** PDF
- **Purpose:** Topic approval and project scope validation

Please keep your submission to **two page** and ensure it addresses the following points:

1. Problem Statement and Target Users

- What real-world problem does your application aim to solve?
- Who are the intended users of the application?

2. User Inputs

- What information or data will users provide to the system?

3. Use of AI

- How will AI be utilized within the application?
- What outputs, insights, or recommendations will the AI generate from the user inputs?

4. Business Rules

- What business rules, validations, or decision-making logic will be applied to the AI-generated outputs?

Repository Information

- Create a GitHub Repository: One team member creates a repository and adds all members as collaborators. Also add your lab-in-charges to your repository

```
git init
git add .
git commit -m "Initial project setup"
```

```
git branch -M main
git remote add origin https://github.com/<team-name>/<repo-name>.git
git push -u origin main
```

- All team members must clone the shared repository

```
git clone https://github.com/<team-name>/<repo-name>.git  
cd <repo-name>
```

- Create a file named for your Project Initial Details
- Add all the details from the “Requirements”
- Also Include the address (URL) of your code repository in the file.
- Commit and push the Initial Details:

```
git add ProjectInitialDetails.md  
git commit -m "Added initial project details"  
git push
```

What you need to submit?

Submit the Project Initial details file in the xSite Dropbox. Make sure it includes all the “Requirements” and the URL of your repository
